## Media Statement 07 September 2021

### MINISTER DIDIZA ANNOUNCES THE REDUCTION OF SIZE OF THE DISEASES MANAGEMENT AREA AFFECTED BY FOOT-AND-MOUTH DISEASE IN KWA-ZULU NATAL

The Minister of Agriculture, Land Reform and Rural Development, Ms.Thoko Didiza, MP wish to announce the reduction of the size of the disease management area affected by foot-and-mouth diseases in KwaZulu-Natal. This decision follows the conclusion of the second round of serological surveillance. It was established that the disease, within the DMA, is still confined to two clusters of diptanks in Mtubatuba and Nongoma. This shows that the restriction on the movement of animals out of, within, through and into the DMA was sufficient to prevent the disease from spreading.

Since the disease did not spread within or out of the DMA, the size of the KZN DMA can now be decreased. This will release areas that remained free of the disease from movement restrictions, while still maintaining restrictions on those areas where the disease is still present. The Minister declared in Gazette No 45109 of 7<sup>th</sup> September 2021 the new KZN DMA, which includes the following areas:

The portions of the Pongola local municipality east of the R66, and south and west of the N2

The whole of the Nongoma local municipality

The portions of the Big Five Hlabisa local municipality west of the N2

The whole of the Mtubatuba local municipality

The whole of the Mfolozi local municipality

The portions of the uMhlathuze local municipality north of the R34

The whole of Hluhluwe uMfolozi Park

In total, FMD was detected and confirmed in 29 locations, comprising two clusters of diptanks in communal grazing land as well as two commercial.

The local municipalities of Umhlabuyalingana, Jozini, eDumbe, Abaqulusi, Ulundi, Nkandla, Mthonjaneni and uMlalazi are now released from movement restrictions.

“I wish to applaud the farmers and communities that have adhered to the movement restrictions imposed upon them, which now made it possible to reduce the area under restrictions” said Minister Didiza

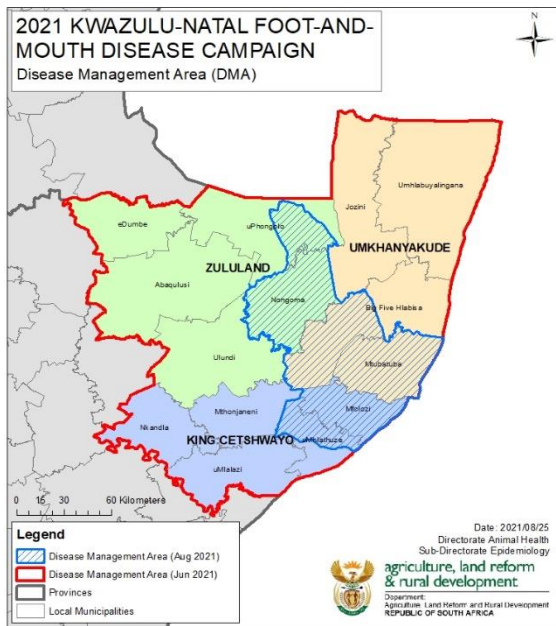

There are still signs of circulating FMD virus within the two clusters, the movement protocol and permit system for movement of cloven-hoofed animals remains in place in the revised DMA. Movement of cloven-hoofed animals and their products into, out of, through, or within the DMA is still only allowed on authority of a permit issued by the Veterinary Services of the area.

The movement protocol can be obtained from KZN Veterinary Services. Visible Veterinary Patrols and roadblocks will remain in place in the reduced DMA to control the movement of livestock and to monitor adherence to the movement protocol. Livestock owners are encouraged to submit all applications for movement to the Provincial Veterinary Movement Control Officers for evaluation and risk assessment. Applications and queries can be submitted to [fmdpermitskzn@gmail.com](mailto:fmdpermitskzn@gmail.com).

All stakeholders are again reminded to continue abiding by the movement restrictions still in place in the reduced DMA, as these restrictions are deemed necessary to prevent the escape of the virus out of the affected areas. As soon as it is clear that there is no longer circulating virus in these areas, the remaining movement restrictions can also be reconsidered.

The map hereunder shows the original DMA, with the red outline, compared to the new revised DMA, indicated as the blue outline and striated area.
